**1. Read the paragraph given below and answer the following questions.**

Forest is a large area covered by naturally growing trees and plants. Forests provide food and shelter to animals, birds, and insects. Forests help to maintain the balance between oxygen and carbon dioxide in the atmosphere. Hence, they are called 'The Lungs of Earth'. Forests provide food, fuel, and other useful materials to us. Forests prevent flooding by absorbing excess rainwater. Forests also prevent soil erosion. As a result, the fertility of soil is maintained.
